## Setting a Default Printer

A default printer is the first printer your computer and software looks to to print. Having an incorrect default printer can lead to issues. Follow the below instructions to set or change your default printer. The instructions were created from a computer running Windows 10, so your process may vary slightly

.

TECHNOLOG

1. Click Start and perform a search for "Control Panel" and open the App

All Apps Documents Web	More 🔻	<u>م</u>
Best match		
Control Panel App		
Apps Settings	>	Control Panel
Intel <sup>®</sup> Graphics Control Panel	>	

2. Click "View devices and printers"

#### Adjust your computer's settings

System and Security Review your computer's status Save backup copies of your files with File History Backup and Restore (Windows 7)

Network and Internet View network status and tasks

Programs Uninstall a program Get programs

3. Right-click on the desired printer and select "Set as default printer." The default printer will show a green checkmark on its icon.

#### **Alternative Method**

1. Search for and access "Printers & Scanners", click on the printer you wish to make default, and press Manage. Then click Set as default.
